PROFILE SUMMARY

Highly skilled and results-driven Software Engineer with 3+ years of experience in designing, developing, and implementing scalable web applications. Expertise in .NET, C#, ASP.NET Core, Web API, SQL Server, and Good knowledge on Azure and Angular. Proven ability to deliver high-quality solutions throughout the Software Development Life Cycle (SDLC) using Agile methodologies. Passionate about leveraging technology to drive innovation and create data-driven solutions. Additionally experienced in Microsoft Power Platform, including Dynamics 365 CRM customization, Power Pages portal development, Power Apps, and Power Automate (Flow) for end-to-end business process automation.

SKILLS

Languages: C#, JavaScript, Angular, TypeScript	Frameworks/Libraries: ASP.NET Core, .NET Web API, ASP.NET, MVC, Entity Framework Core, LINQ, ADO.NET, WCF, Winform, Angular	Database: SQL Server, MYSQL, MongoDB, Oracle, PostgreSQL
Development Tools: Visual Studio, Visual Studio Code, Postman, SQL Server, Jira, Management Studio, GitHub	Methodology: Agile, SCRUM, SOLID Principles, Design Patterns (Repository, Singleton, Dependency Injection)	Cloud Services: Azure, Azure Storage Account, Azure Functions, Azure Service Bus, Azure Logic Apps, Azure Key Vault
Testing: Unit Testing (nUnit, Moq), Integration Testing		Microsoft Power Platform: Microsoft Dynamics 365 CRM, Power Apps, Power Pages, Power Automate (Flow)

WORK EXPERIENCE

Application Developer Dynatech system Key Responsibilities:	Feb 2026 - present Ahmedabad, India
• Worked on Microsoft Dynamics 365 as a developer, including CRM customization and portal (Power Pages) development. • Developed and maintained CRM solutions, including entities, workflows, plugins, and integrations. • Built and deployed Azure Functions for backend processing and API integrations. • Worked extensively with .NET technologies for application development and service implementation.	
Software Engineer- R&D Bankai Infotech Ltd. Key Responsibilities:	Jun 2022 – Jan 2026 Ahmedabad, India
• Designed and implemented monolithic architecture for new features, improving application scalability and maintainability. • Developed and maintained high-performance web applications using C#, ASP.NET, MVC, Web API, SQL Server, ADO.NET, and Entity Framework Core within an Agile environment.	

- Translated business requirements into scalable technical solutions, adhering to best practices and project roadmaps.
- Upgraded and migrated applications to the latest .NET version to improve performance and security.
- Conducted code reviews to ensure high code quality and adherence to software quality standards.
- Utilized Azure DevOps for project planning, code collaboration, automation, and deployment.

CERTIFICATES

Best Debutant Award	Nov 2022 – Bankai Infotech Ltd.
Rising Star Award	Apr 2024 – Bankai Infotech Ltd.
Azure Function, Logic Apps & Blob Storage for .NET Developer	Aug 2025 – Udemy.
Angular - The Complete Guide (2025 Edition)	Oct 2025 – Udemy.

PROJECTS

1. SAICA TCMS (Trainee Contract Management System) | Company: Dynatech System

Description: SAICA is a South African project for Chartered Accountants. Developed the TCMS (Trainee Contract Management System) module to create trainees and generate contracts in an end-to-end flow.

Role & Responsibilities:

- Developed Power Pages portal for the TCMS module, enabling trainee creation and contract generation end-to-end.
- Provided support for ticket-based change requests within the TCMS application.

Tech Stack: Microsoft Dynamics 365, Power Pages, CRM Customization, Plugins, Workflows, .NET, Azure Functions.

2. Projects at Bankai Infotech Ltd. (Jun 2022 – Jan 2026)

RA, FMS, MD, CM, SSO, UM

- RA (Revenue Assurance): the use-case of Revenue Assurance is to find the leakage of revenue in the telecommunication industry.
- FMS (Fraud Management System): The solution is used to find the Fraudster in telecommunication and to perform the specific action on the Fraudster.
- CM (Case Management System): the use-case of CM is to register a Case against of Fraudster and leakage of revenue in RA and FMS.
- SSO (Single Sign On): Single Sign-on is a customized solution for better security and to automate the sign-on process for the client application.
- UM (User Management): is a centralized User Management system for all the applications of clients new users are created and managed from this system.
- MD(Mediation): Mediation is Use for convert encrypted cdr file into descript files format for RA and FMS.

Responsibilities:

- Managing multiple applications in the telecommunication industry.
- Hosting the application on IIS Express.
- Created The Window Services.
- Worked on the Migration of Application Web and API from .NET 4.6 to .NET core 3.1
- Develop web application .NET Core 6
- Bug analysis and Bug fixing.

Tech Stack: C#, .NET Core 3.1, .NET Core 6, .Net Core 8, MVC, MySQL, entity framework, Unit of work, JavaScript.

2. Bill-Call (Telco) | Client: BTI, Sudatel, Greencom, VTL, Kalaam, Qcell

- The Motive for developing the Bill-call Portal is to handle the Routing, Rate, Billing, and Roaming in the

Telecom Industry, the portal help customers and vendor provide all facility as per their need to generate revenue based on their margin and Products.

Responsibilities:

- Understanding the specification of client requirements.
- Involved in designing Windows Services and Web as per Client Needs.
- Worked to resolve the Defects.

Tech Stack: C#, SQL, Asp .NET, Windows-Form Application, Windows Services.

3. Scrum Tracker

- Scrum note is used to quickly share what each team member did yesterday, what they plan to do today and if they any blockers. It helps the scrum master track progress and support the team. Worked to resolve the Defects.

Responsibilities:

- Developed .NET Core Web API based on project requirement, implement Repository and Unit of Work design pattern. Implement Authentication and Authorization using JWT Token, Role Base using .NET Core Web API.
- Design and implement Angular guards, routing, and services, Component, along with role-based feature access. Used RxJS to call Web APIs and handle asynchronous data streams efficiently in angular application.

Tech Stack: Angular (19), C#, .NET Core 9, TypeScript, Design Pattern.

EDUCATION

B. Tech in Computer Engineering

Atmiya university

8th -semester: 7.45 CGPA

Jul 2018 – Jun 2022

Rajkot, India
