PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience in software development, hands-on experience in ASP.NET Core, C#, Angular, SQL Server, REST APIs, Microservices, and Azure Services. Skilled in developing scalable web applications, optimizing performance, and delivering high-quality solutions in Agile environments.

PROFESSIONAL EXPERIENCE

Dynatech Systems

Application Developer

Ahmedabad, Gujarat

02/2026 – 06/2026

- Design, develop, and maintain CRM-based web portals using **Microsoft Dynamics 365 Power Pages**.
- Configure and manage **Dataverse** entities, relationships, forms, views, and security roles.
- Develop and customize portal functionality using JavaScript, Liquid templates, HTML, CSS, and Power Pages features.
- Create and manage automated business processes using **Power Automate Flows**.
- Integrate external systems and services through **Azure APIs** and REST APIs.
- Optimize application performance and improve data processing efficiency for large datasets.
- Troubleshoot and resolve portal, Dataverse, and integration-related issues.
- Collaborate with Business Analysts, stakeholders, and development teams to gather requirements and implement solutions.
- Participate in deployment, testing, and support activities across development, testing, and production environments.

Skills: Microsoft Dynamics 365 Power Pages, Microsoft Dataverse, JavaScript, HTML, CSS, REST API Integration, Azure API Integration, Solution Deployment & Support, Performance Optimization, Power Automate

Bankai Infotech

Software Engineer

Ahmedabad, Gujarat

06/2022 – 01/2026

- Oversee the design and implementation of multiple product modules utilizing the **.NET Framework and .NET Core, C#**.
- **Optimized complex SQL Server queries, reducing executing time by over 90%** and significantly enhancing application performance.
- Implemented advanced engineering techniques to resolved **performance bottlenecks**, optimizing the application's performance to surpass expectations, and reducing **SLA breaches by 50%**.
- Implemented **Redis caching** using the **Decorator Design Pattern** to improve **application performance** and **reduce database load**.
- Spearheaded the utilization of **SonarQube** to identify and address **technical debt**, resulting in a **20% reduction in code vulnerabilities** and improved software reliability for a seamless user experience.
- Streamlined Azure Key Vault connections across 30+ services, **reducing code redundancy** by 40% and enhancing maintainability for future updates.
- Designed, developed, and maintained **single-page application** utilizing **Angular version 19**.
- Participated in peer **code reviews** and **sprint demos**, gaining exposure to agile practices and improving code quality awareness.
- **Mentored** Jr. Software Engineers, encouraging best practices, standard, and continuous improvement of practices & processes.

Key Projects

Telecom Application Suite (RA, FMS, MD, CM, SSO, UM) | Client: Telecommunication Industry

- **RA (Revenue Assurance):** used to identify and prevent revenue leakage across telecommunication billing and usage processes.
- **FMS (Fraud Management System):** detects fraudulent activity within the telecom network and triggers appropriate actions against fraudsters.
- **CM (Case Management System):** used to register and track cases raised against fraud (from FMS) and revenue leakage (from RA).
- **SSO (Single Sign-On):** a customized solution that automates and secures the sign-on process across client applications.
- **UM (User Management):** a centralized system for creating and managing users across all client applications.
- **MD (Mediation):** converts encrypted CDR (Call Detail Record) files into decrypted, structured formats consumed by RA and FMS.

Responsibilities:

- Managed and supported multiple applications across the telecommunication domain.
- Hosted applications on IIS Express.
- Created and configured Windows Services.
- Migrated Web and API applications from .NET 4.6 to .NET Core 3.1.

- Developed new web application modules using .NET Core 6.
- Performed bug analysis and resolution.

Tech Stack: C#, .NET Core 3.1, .NET Core 6, .NET Core 8, MVC, MySQL, Entity Framework, Unit of Work, JavaScript

Bill-Call (Telco) | Client: BTI, Sudatel, Greencom, VTL, Kalaam, Qcell

- Developed a billing portal to handle routing, rating, billing, and roaming for the telecom industry, enabling customers and vendors to generate revenue based on their margins and products.

Responsibilities:

- Gathered and understood client requirements and specifications.
- Designed Windows Services and web components as per client needs.
- Resolved application defects.

Tech Stack: C#, SQL, ASP.NET, Windows Forms Application, Windows Services

Scrum Tracker

- Built a tool to help teams quickly share daily updates (what was done, planned, and any blockers), enabling the scrum master to track progress and support the team.

Responsibilities:

- Developed .NET Core Web APIs using the Repository and Unit of Work design patterns; implemented JWT-based authentication and role-based authorization.
- Designed and implemented Angular guards, routing, services, and components with role-based feature access; used RxJS to call Web APIs and handle asynchronous data streams.

Tech Stack: Angular 19, C#, .NET Core 9, TypeScript, Design Patterns

Skills: ASP.NET Core, .NET Framework, RESTful API, JavaScript, TypeScript, Angular, SQL Server, Azure Functions, Azure Blob Storage, Azure Key Vault

EDUCATION

Atmiya University

B. Tech Computer Engineering

Rajkot

07/2018 – 06/2022

SKILLS

- **Technical Skills:** C#, JavaScript, TypeScript, SQL
- **Technologies:** ASP.NET Core, ASP.NET MVC, RESTful API, Microservices, Angular, SQL Server, My SQL, MongoDB, LINQ, ADO.NET, Dapper, Entity Framework Core, Azure, Design Pattern, Docker, Kubernetes, Microsoft Dynamics 365 Power Pages, Dataverse, Power Automate
- **Tools:** Visual Studio Code, Visual Studio 2022, SonarQube, GIT, SSMS, Postman, Azure DevOps

CERTIFICATIONS

- Microsoft Power Platform Developer Associate (PL-400)
- Udemy Certified: Azure Function, Logic Apps & Blob Storage for .NET Developer
- Udemy Certified: .NET 8 Microservices: DDD, CQRS, Vertical/Clean Architecture
